

Are you a skilled worker from overseas, living in Australia?

New Zealand

United Kingdom

South Africa

Ireland

Are you experienced/skilled in one of the following trades?

- Carpentry
- Solid Plastering
- Painting and Decorating
- Brick and Blocklaying
- Wall and Ceiling Lining
- Waterproofing
- Floor and Wall Tiling
- Concreting
- Roof Plumbing

We can help you!

Did you know that to legally work in Australia as a contractor you will need a licence that will only be issued on presentation of an AUSTRALIAN trade qualification? Your certificates from your home country and your experience may not get you the contractor licence you need to operate as a legal sub-contractor or tradesperson.

At the Master Builders Association we are able to formally recognise your trade certificates, knowledge and experience through 'credit transfer' and 'recognition of prior learning'. It is a straight forward process we have developed that paves the way to an equivalent Australian trade qualification for you.

I contacted Master Builders Association NSW, supplied a portfolio of evidence and within 3 weeks. I had my Certificate III in Carpentry. I also achieved my Certificate IV in Building and Construction through the Master Builders. All of my NZ quals were used as evidence. – Fantastic!

James Hancock

Kiwi living in Sydney

I achieved my Certificate III in Carpentry through the Master Builders Association. I supplied a portfolio of evidence and had a meeting with an assessor to demonstrate my knowledge – Too easy!
